Art Unit: 3663

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-52 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as his invention.

The terminology "comparing the estimated source waveforms to determine..." in pending independent claims 1, 23 and 36, makes the aforesaid pending claims vague and indefinite. The metes and bounds of the above cited claims can not be determined with a reasonable degree of certainty by one skilled in this art as it is unclear what is being compared to the estimated source waveforms. Although it is evident from Applicants specification that the estimated source waveforms are compared to each other, the claim language fails to clearly claim such comparison.

2. Claims 1-58 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-57 of copending Application No. 10/027749. This rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186

(1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

3. The references cited by Applicant (PTO-1449s ; paper # 2) have been considered and found generally representative of the state of this art. Applicant is requested to make of record in this application all relevant and material prior art of record in Applicants related patent applications.

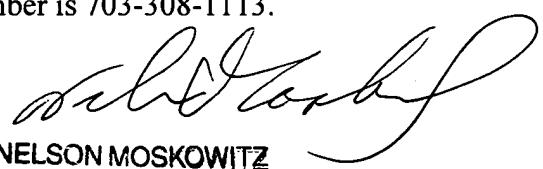

4. References A-F and N (PTO-892) are cited to show Applicant's related publications, and the widespread knowledge of using source waveform estimations in seismic data processing. However, the prior art fails to obviate the additional step of comparing estimated source waveforms as claimed.
